

## **Project:Possibility SunSPOT Project Meeting Agenda**

11:00 A.M. – 1:00 P.M. March 15<sup>th</sup>, 2008

### **Attendees:**

Irina Abramova  
Nikhilesh Kruthiventi  
Praveen Kansara  
David Woollard  
Winnie Yip

### **Minutes From Last Meeting:**

The team went through the PDR draft. Dave suggested talking points for each slide and everyone reviewed the sections they had contributed. We decided that there was no additional material that we should add, though everyone was concerned with the current length.

Dave suggested that we plan to present approximately 20 slides in depth. In order to cut down on the number of slides presented, the team went through the design section and annotated several slides with “documentation only.” Dave went over the rationale for documentation only slides: The slides as printed would still be complete for reviewers, but we would be able to make the time requirements for our presentation all the same.

Finally, Dave suggested a presentation breakdown. Praveen volunteered to take a bigger role in CDR, so he will not present at PDR. The rest of the slides broke down like this:

Slide 1-9: Winnie  
Slide 10-15: Sean  
Slide 16-18: Nikhilesh  
Slide 19-20: Dave  
Slides 21-24: Irina  
Slides 25-37: Dave

We decided that we would practice our individual parts this evening and meet again at 6:15 pm tomorrow in Mudd Hall to do a run through prior to the general meeting.
